PETROZORB

Pètrozorb – natural plant absorbent with bio-remedies – CF x 10 – Cod 36500

Pètrozorb consists of a mixture of 5 different types of plants that have the advantage of making the product non-abrasive and regenerating. It is therefore biodegradable at 100%. It has a high absorption capacity guaranteed by the ultra porous structure that allows the product to absorb hydrocarbons while maintaining the pollutant fluid inside the granule.

For more information on Pètrozorb [click here](#)

It is available in 10 kg – 50 l polyethylene bags. absorption: ca. 40 l per bag

Packing: pallets of 50 bags (dimensions: pallets cm 120 x 100 x h 147 – pallet weight: net 500 kg)
